

ADAGIO

ACCOUNTING SIMPLIFIED

INTRODUCTION

Adagio helps growing small and mid-sized businesses to perform like never before. From office room to warehouse, desktop to cloud, Adagio empowers the organization's ability to perform expeditiously, while producing business insights beyond just debits and credits. Unrestricted transparency into the accounting means meaningful corporate insight.

Designed especially for small and mid-sized enterprises, Adagio is an affordable, robust and scalable accounting solution, available both for on-premises and in the cloud. Backed by an experienced team, Adagio facilitates organizational growth, increased profitability, and reduced manual workarounds.

Powerful Reporting Tools

With unique analysis and reporting tool Adagio FX Pro, drill down to practically any desired data in a report to see all relevant information.

True Departmental Reporting

Adagio provides a complete set of tools to manage and streamline accounting operations separately for every department in your business or your subsidiaries

Paperless Accounting

Adagio's DocStore is a NextGen document management solution for small and mid-sized businesses to allow them to go paperless.

Key Differentiators

Adagio offers contemporary solutions – built with experience for growing small and mid-sized organizations.

Batches are Better

Batches offer better control over the transactions being entered into the sub-ledgers and ledger. Manage large volume transactions with less human error and a tight audit trail.

Automated Data Care & Security

Optimize the potential of automation with automatic data integrity checks and backups on all your accounting data.

Impeccable Data Entry

Keyboard centric data entry allows for efficiency, keeping your hands primarily on the keyboard enables task completions on time.

BUSINESS BENEFITS

Adagio enables you to improve efficiency and seize opportunities in a much better way.

01

Meaningful Business Insight

Easy access to real-time data anywhere in the system helps you make data-driven decisions and explore new business opportunities.

02

Affordable Scalability

Affordable upgrades and customization to improve performance when you add new functions and modules.

03

Precise Insights

Real-time analytical business intelligence reports revealing key performance indicators and proactive business alerts for unparalleled day-to-day administration.

04

Improves Efficiency

One centralized solution eventually boosts efficiency by providing the right information to the right person at the right time.

05

Extensive Customer Support

An extensive network of business partners provides unparalleled business support.

06

Deployment Options

Be it in your office or the cloud, deploy Adagio in whatever way it best suits your business

07

Expand Your Reach

Adagio supports multiple currency transactions with accurate exchange rates so you can accurately do business globally.

08

One for All Solution

Adagio has modules for accounting, sales, purchasing, banking, reporting, and inventory control.

09

Concurrent Usage

No performance compromise as more users access the software concurrently.

10

Quick Time to Value

Tested and proven business solution that pays for itself in no time. With the help of experts, implement Adagio and get started in few days.

FUNCTIONALITY OVERVIEW

Adagio is a complete and versatile accounting solution with an easy-to-use interface for your business.

01

Accounting

Better control over financial transactions including general ledger, accounts payables and receivables, invoicing, journal entries, multiple cost centers, and budgets.

Banking

Keep tabs on all financial processes such as receipts, bank transfers, deposits, payments, credit card payments, and reconciliations.

02

03

Sales and Purchasing

Effortlessly generate quotes, handle order entry, update stock information, manage all payments and invoices and expedite shipping. Control supplier transactions such as issuing purchase quotes and orders, calculating product landed costs, and managing returns and credits.

04

Customer Relationship Management

Manage all the information on customers and suppliers including contact profiles, pending payments, previous engagements, and sales analysis in one easy to navigate system.

Inventory Control

A simple yet powerful inventory module helps in handling multi-location stock control, price lists, special price agreements, and stock location tracking and transactions.

05

06

Reporting

Generate powerful reports for every aspect of your business including balance sheets, sales, cash flow and more. Adagio provides tools for graphical reporting and the ability to create presentation-quality financial statements.

ADAGIO CLOUD

Packaged and priced as cost-effective with high-value bundles of accounting applications, Adagio cloud is a cloud-hosted version of the on-premise software package. Enjoy all the functionality of an established accounting software solution while utilizing the technology offered by smartphones and tablets, to run your organization from any location, at any time.

OUR INDUSTRY EXPERTISE

Wholesale Distribution

Adagio enables companies in the Distribution industry to purchase inventory at the optimal price and ensures the goods are sold with the correct margin, markup or set price.

Not for Profit

Adagio provides Not for Profit organizations like Community Living, Family & Social Services organizations and Churches the functionality and reporting capabilities to enable the organizations to run efficiently and cost-effectively.

First Nations

Adagio is a recognized leader with more than 200 First Nations clients. First Nations often run many different programs in health, education, heritage, social services, housing and more with requirements for a robust accounting software solution.

Construction

Construction companies and their suppliers manage many complex jobs with different schedules, budgets, teams of workers, and equipment. Adagio was designed with these complexities in mind and offers extensive integrated tools to monitor the budget, revenue, expenses, and profitability.

Professional Services

Companies that sell services need systems to help with the following time and resources. Adagio offers a broad-spectrum solution enabling service-oriented businesses to track and manage time, billing, reporting and payroll in the most effective way possible.

Public Practice Accounting

For accountants and bookkeepers in public practice with Not for Profit or First Nations clients, Adagio Accounting provides a valuable alternative to entry-level accounting solutions.

THE SOFTRAK STORY

Founded in 1984, Softrak Systems is the developer of accounting software solutions. Softrak has more than 2000 happy clients in 10 different countries. Over 200 First Nations organizations currently use Adagio. In 2014, CPA Advisor ranked Adagio among the top 3 small business accounting software solutions in North America. CFO Tech Outlook ranked Adagio among "Top 10 Financial Reporting Solution Providers" in July 2018.
