

# Insights and advice from better data

Accurate data for actionable insights.

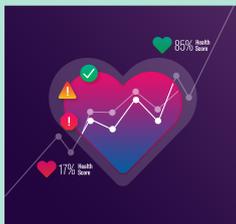

## Some things are stronger together.

Dext Precision gets real-time, accurate data at your fingertips. Give compelling financial insights into your clients' businesses. And place profitability and productivity at the heart of your practice.

### Productive practice tools

Using Dext Precision get you full oversight of team workload and client performance in a simple, single view - helping you grow faster by managing smarter.

### Intelligent data clean up tools

Use the HealthScore to understand and plan the time you'll need to check your client's data. Track changes, easily back-check data and detect any errors or duplicates automatically.

### Quick and easy reporting

Help clients understand their financial position and make business decisions from better data. Dext's Match tool captures live and accurate cost data to enable a full financial picture of your client's business in real time. Dext Precision helps you turn this into bespoke client reports on supply chain spending, tax risk and cashflow.

## Everything you need for advisory, all in one place.

### Cashflow

Use health checks and real time cashflow advice to help clients feel more in control.

### Data-driven pricing

Manage scope creep and price services effectively with a better view of data.

### All your data in one place

View client information all in one place and sync across your tech stack.

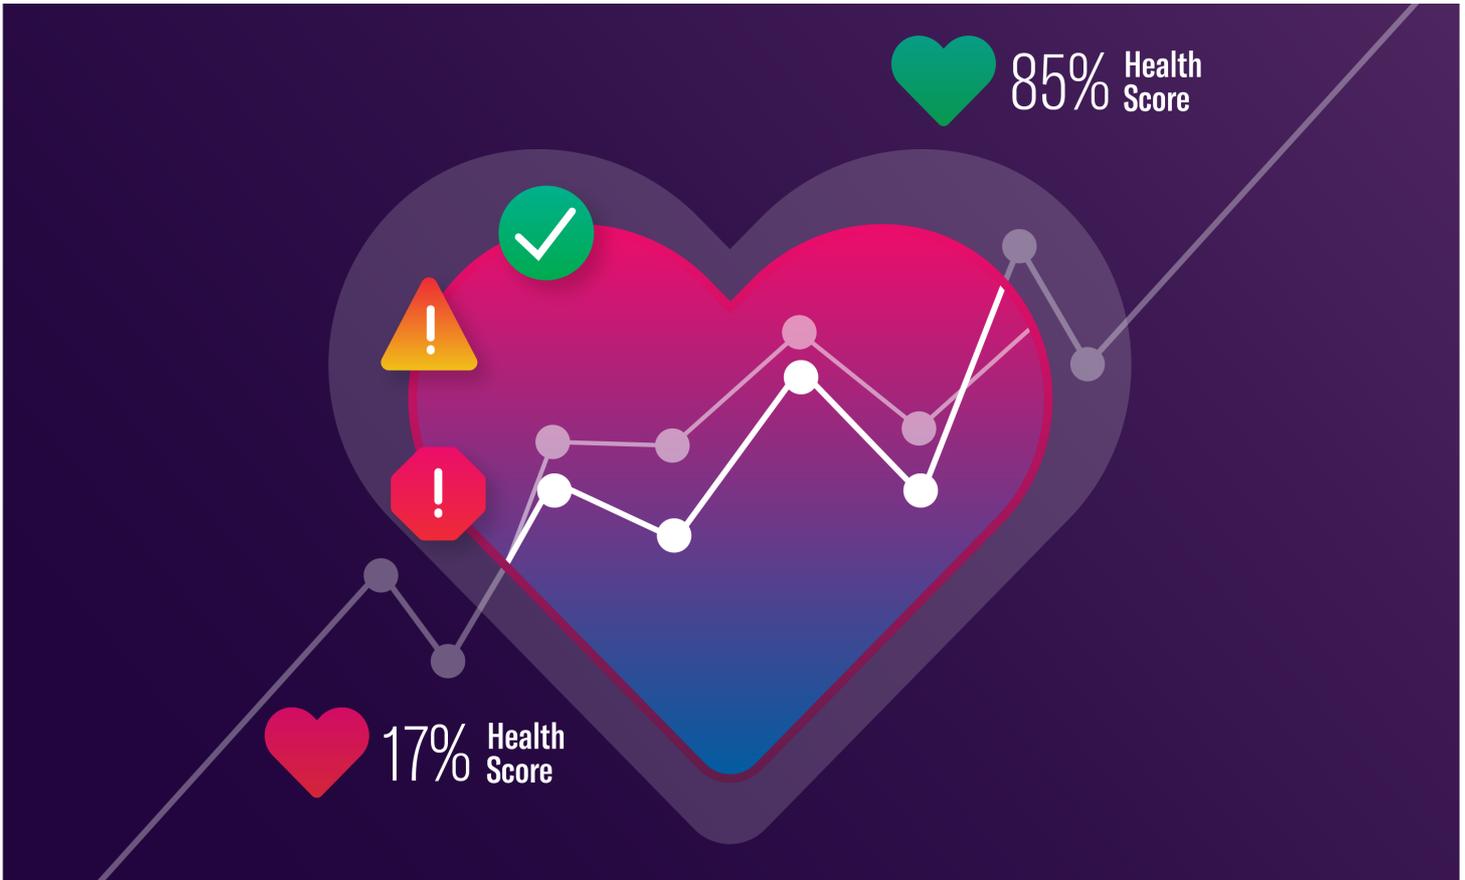

### Get your client's Health Score

Get a health score for a client before you even start working with them to see the quality and complexity of their data and price accurately.

Lifestyle Bookkeeping Systems

Dext Precision Is A Game Changer For My Business I have been using Dext Prepare for many years as a bookkeeper and love the reliability and user experience. They have now added Dext Precision and it has already increased my bottom line. It gives great insights when quoting on a new client, even if they are reconciled.

Proficio Solutions

We've been using Dext (known as ReceiptBank until recently) for some time - for us just the ability to extract data from invoices and receipts was like having an extra pair of hands. Now with the addition of Dext Precision, we have an extra pair of eyes too as it scans through our Xero data looking for compliance issues and more time-saving suggestions leaving us with more time to provide advice and insight to our clients.

**Bewitching Bookkeeping**

This is my favourite software of all time. It has enabled me to elevate my bookkeeping practice way more than I could ever imagine. It is like having an employee working with me. And having both the Prepare and Precision package with Dext has made it a dream to work with. Thank you Dext.
