*Not included with QuickBooks Payroll Core

** GPS tracking: QuickBooks Workforce mobile app allows users to share their location data while they are on the clock. Cell service required for GPS points accuracy. QuickBooks Time does not save GPS points for users when they are off the clock. Account admins may require users to set their location settings to "Always" in order to clock-in and track time using the QuickBooks Workforce mobile app.

¹Auto payroll: Available if setup for the company is complete. At least one employee has completed setup and has consistent payroll that qualifies for automation (i.e. salaried or hourly with default). Company must complete bank verification if the employee has direct deposit as the payment method, and the first payroll must run successfully. The account must not have a hold.

²Automated taxes and filings: Automated tax forms are available for reporting payroll taxes to the CRA and Revenu Québec. Customer must still proactively file and pay such payroll taxes.

Payroll, time tracking, and benefits, all in one place
