Spire

Spire Cloud-Hosting Details

Spire Cloud-Hosting is an affordable solution for those business looking to lower their infrastructure costs and flexibility to work from anywhere.

With Spire You Have Options

Spire is your solution to an affordable and scalable software designed to give your business the room it needs to grow.

Spire is a business management and accounting software for small and mid-sized companies, enabling them to streamline operations, gain better insight and maximize their business potential.

Our software gives businesses the flexibility and scalability to differentiate from the competition.
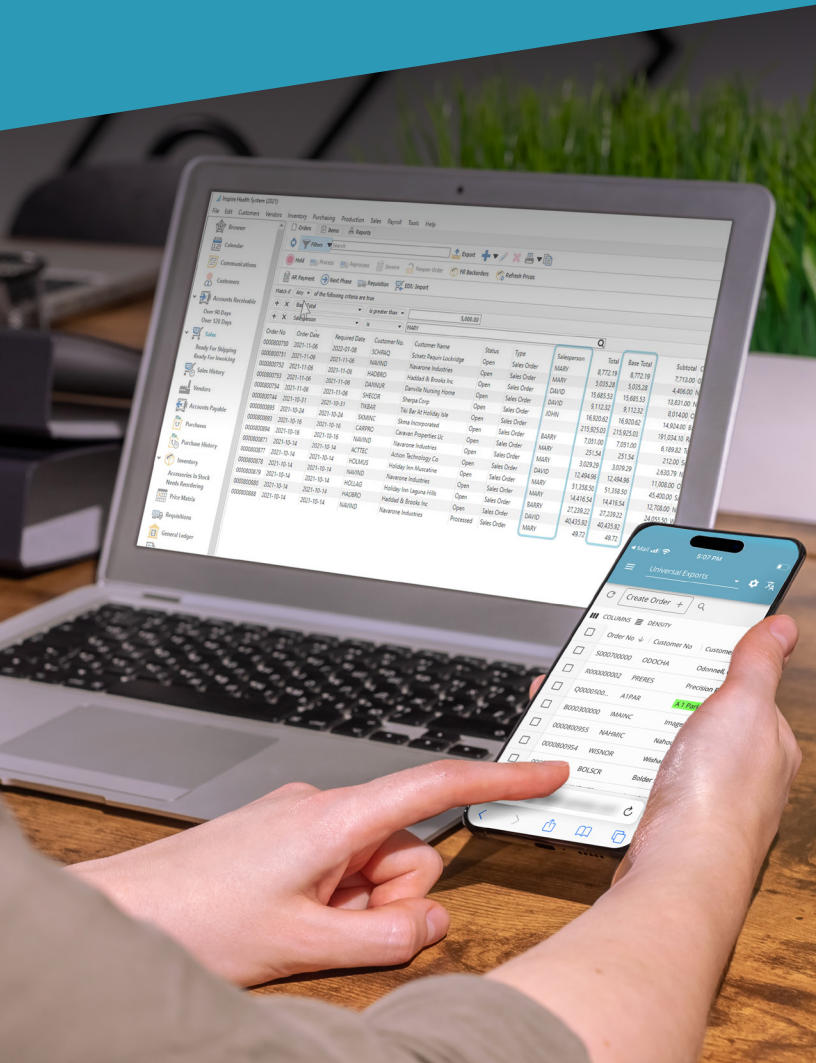

Designed to automate business processes and optimize inventory control, our solution will help cut costs, improve margins and meet customer demand.

Spire Modules are fully integrated and provide strong back-end accounting with robust operational functionality.

Our software provides flexible purchasing options for your business to consider.

- ✓ Classic on-premise
- ✓ Monthly Cloud Hosting as low as $100 per month
- ✓ Complete Monthly Subscription with exclusive benefits as low as $320
- ✓ Leasing options with preferred Spire rates

Spire Options gives your company the opportunity to have affordable ERP power.

Spire Cloud-Hosting Brings A Range Of Advantages:

Reduced IT costs:
- Moving to Spire Cloud-Hosting may reduce the cost of managing and maintaining IT systems.

Data Security
- Spire Cloud-Hosting provides multiple levels of security including advanced encryption and access control to ensure that only authorized users can access the data. Spire Cloud Hosting also automatically backs up your data so clients don't run the risk of losing vital records.

Scalability
- Businesses can scale up or scale down their operations quickly. Rather then installing software and upgrades, Spire-Cloud Hosting provides the hosted environment and ensures the client is running the most current version of Spire.

Collaboration
- With Spire Cloud-Hosting, team members can collaborate more easily. There is no need to manage multiple versions of the same file or copy data onto thumb drives to share it with others.

FAQs

In the event of downtime?
- We have detailed monitoring and alerting and make every effort to prevent downtime to your instance. In the event your instance is down, we're probably already working on it.
- Send an email to partner support with the subject of "Urgent - Hosted Server Down" and someone will respond with a status update within an hour

Back-Ups & Security
- Database backups are included in encrypted AWS S3 storage
- Snapshot schedules are respected and snapshots can be downloaded at any time

Where are your data centers?
- Canadian clients have their data hosted in Central Canada data centre
- USA clients have their data hosted in the US West data center

Security
- The Spire database is stored in a secure AWS instance
- All communication between Spire Desktop and the hosted Spire Server is encrypted with TLS
- Spire implements password policies that encourage strong passwords
- Spire implements rate limit authentication failures to prevent brute force attacks
